ALUMINIUM

1,080,000 pieces of furniture supplied

120,000 satisfied customers

5,500 square metres of production facilities

60 distribution points worldwide

35 destination countries

1 goal:

*„To create furniture that combines refined design,  
durability, and timeless craftsmanship.“*

Ladies and Gentlemen,

We are pleased to present a new RONDO catalogue for the coming season. It showcases our current collection of garden furniture and accessories, crafted from a beautiful, durable and, above all, natural material – black locust wood (robinia).

For many years, we have been manufacturing high-quality garden furniture with great care and consistency. As a family company founded in 1989, we follow current design trends while remaining faithful to proven craftsmanship and timeless forms. Each season, our design team develops new collections that combine contemporary style, durable materials and carefully selected colour palettes.

We firmly believe that excellence lies in the details. That is why every stage of our production process is of great importance to us and why our technologies are continuously refined. From the very beginning,

our guiding principle has been uncompromising quality and, as a result, long-term customer satisfaction.

Today, several thousand families around the world use furniture manufactured by our company. Our products are supplied to numerous countries worldwide, and the trust we have earned over the years motivates us to continue developing our offer with the same values and commitment.

We hope that this catalogue will help you learn more about RONDO as a reliable business partner. We believe that both you and your customers will appreciate our new products and continue our cooperation in the friendly and professional atmosphere that defines our company. With such a diverse offer, everyone can find something suited to their needs. We are also open to individual projects and custom solutions.

*Marcin Gołębiowski*  
CEO RONDO Polska

## ABOUT RONDO

---

*Functional by design.  
Natural by choice.  
Timeless by character.*

The beginning of Rondo Polska dates back to 1989. Since that time, it has remained a family company. A constant pursuit of perfection, hard work, and the experience gained over the years helped transform a small workshop into a company manufacturing furniture and garden accessories with a strong position in Europe. Initially focused on metal products, after several years of development and growing expertise, the company began designing and manufacturing garden furniture. The company was founded on strong family values, developed over many years by its founders, combining craftsmanship tradition with a modern approach to design and management. Our management is based on values such as honesty, reliability, and respect for others. We believe that product quality is of central importance and we do our utmost to ensure that our furniture is practical, beautiful, and durable.

*'I have simple taste. I like the best.'*

Oscar Wilde

We have full control over our production process. All stages take place in our own plants, allowing us to manufacture furniture from scratch. We operate two production facilities equipped with modern

technology — one producing metal elements and the other finished furniture. Our headquarters are located in the Polish town of Wołów, surrounded by beautiful forests.

The uniqueness of our products, resulting from advanced technologies and a highly qualified team, has established us as an important manufacturer. This is confirmed by numerous contracts with both local and international partners. We supply our products to most European countries. Over the past twenty years, our team of specialists has continued to grow, and today more than 100 people work for our company.

From the very beginning, we have regularly updated our offer, introducing new products to meet the expectations of our customers. We closely follow market trends, while our designers continuously develop original styles and increasingly ambitious concepts.

The exclusivity of our products is widely appreciated by customers across Europe. We have been a reliable partner for many years and sincerely hope to become yours as well.

## WE BELIEVE IN NATURE

---

### *Caring about the environment*

The basic material we use to produce our furniture is black locust wood, acquired and processed in accordance with all the standards and regulations of the Forest Stewardship Council.

Out of concern for the environment, we make sure that all of our products have a certificate from the FSC®, which promotes responsible forestry. We guarantee our clients that the wood we use to make our products does not come from:

- forest areas where tradition or civil rights are violated
- forest areas of special environmental value
- genetically modified trees
- illegal felling
- natural forests converted into fields or any non-forestry purpose
- areas cultivated with dangerous chemical fertilizers

By using the FSC logo we make a commitment to the rights of the workers and to the welfare of local communities.

By choosing our products you lend support to extensive environmental protection programmes aimed at countering illegal overfelling, which impoverishes biodiversity of forestial ecosystems around the world.

Each time you buy a product with an FSC certificate, you support responsible forestry. You know that your purchase will not cause harm to the world's forests or support companies which violate human rights.

Your choice matters...

## ABOUT DESIGN

---

*Essence of modern and innovative technology as well as fine and skilful craft.*

It is a combination of subtle chic and intriguing, sophisticated design. Our furniture will become a priceless element of the décor of your living room, terrace or garden. Large and comfortable places to relax will also add some dignity and formality to every kind of interior. Solid constructions create representative and at the same time calm and relaxing places.

All our collections are easily distinguishable because of their interesting and elegant style. They are toned down and subtle, and at the same time comfortable, functional and practical. But we design our furniture also bearing in mind their price, endurance so that they can be easily maintained and used for many years. Our offer has got something for everyone. Those who are keen on simplicity as well as more romantic souls. Let us offer garden and terrace furniture, hotel and bar sets as well as swimming-pool ones. With the variety of our offer we try to meet the expectations of different needs, tastes and dreams. People who want to live a pleasant life in a beautiful place.

Each collection can be accompanied with some practical accessories including deckchairs, cocktail cabinets, footrests or cushion cabinets.

We have built our strong position on the market manufacturing solid and durable furniture. As we aim at customer's satisfaction. RONDO always selects best materials: European wood: black locust, light and durable aluminium framework together with carefully forged, durable metal constructions.

Our designers and technology experts cooperate with the suppliers and also rely on the opinion of each customer to manufacture top-quality products. We develop manufacturing methods which are more effective and innovative, and the materials we use surprise with their look and endurance. Rondo collections are a genuine prestige in your garden, living room or on your terrace. They will excite all exclusive design lovers. We believe that you will share the satisfaction of the thousands of our customers.

---

We are the laureate of competitions „Diament meblarstwa 2019 & 2020 ” In the category ‚Outdoor zone’. Our collections of leisure furniture - NOURD & TOSCANIA, won. More information: [www.diamentmeblarstwa.pl](http://www.diamentmeblarstwa.pl)

# WHAT IS OUR SECRET?

All our wooden furniture is made of black locust. It is often commonly but erroneously called acacia (or erroneously associated with Vietnamese acacia). Its wood is extremely resistant to changing

weather conditions, so typical for our climate zone. Wood hardness is along with thickness one of the most important features of wood. Black locust is considered as very hard' wood.

Category	Hardness	Scope kG/cm2	Scope MPa	Example species
1	very soft wood	fewer than 350	fewer than 34,4	asp, poplar, willow, spruce, fir
2	soft wood	350-500	34,3-49	lime, pine, birch,
3	moderately hard wood	500-650	49-63,7	oak, elm, chestnut
4	hard wood	650-1000	63,7-98,1	ash, jatoba, teak
5	very hard wood	1000-1500	98,1-147,1	<b>black locust (robina)</b> , rosewood, yew
6	bone-hard wood	more than 1500	more than 147,1	ebony, coconut

Because of its features, black locust wood is used for building bridges, playgrounds, posts and sport equipment. Robinia (black locust) trees provide very valuable wood - light in colour and weight, hard and resistant to rotting. The beautiful and warm colour of black locust wood ideally matches the full of green garden scenery. Such additional components of black locust as tanners, rubbers, resins and essential oils improve wood resistance. Tanners are natural preservatives which prevent it from rotting. Others, e.g. resin compounds, are a kind of mechanical barrier which stop

mould from spreading in the wood. But it's not everything. Thanks to impregnation (using oil- and wax-based substance) you can also enjoy the ideal look of the furniture for a long time, without bothering about time-consuming maintenance or losing the original look. Such substance not only protects our furniture, but it also shows up the natural beauty of black locust. We guarantee top quality of our products and we hope that you will share the satisfaction of our numerous customers.

Black locust wood oiled with dedicated natural oil; first class resistance to weather conditions.

Drewno robinii akacjowej olejowane dedykowanym naturalnym olejem; pierwsza klasa odporności na warunki atmosferyczne.

Appears only in Sunbrella fabrics. Sunbrella fabrics: 100% acrylic, waterproof, stain resistant, mass dyed, UV resistant, mold resistant, breathable, 5 years warranty (rotting, mold and colors fastness), max. temperature 70°C, weight 280g/m<sup>2</sup>

Występuje tylko w tkaninach Sunbrella. Tkaniny Sunbrella: 100% akryl, wodoodporny, plamoodporny, barwiony w masie, odporny na promienie UV, odporny na pleśń, oddychający, 5 lat gwarancji (na butwienie, pleśń i trwałość kolorów), temp. max. 70°C, gramatura 280g/m<sup>2</sup>

Calipore foam - quick drying foam (Quick Dry). Ideal foam for outdoor pillows. Large and open pores allow water to penetrate, allowing it to drain and circulate air, so you can use the pillows shortly after getting wet. Dries almost instantly. It has antifungal and antibacterial properties.

Pianka Calipore - pianka szybko wysychająca (Quick Dry). Pianka idealna do poduszek zewnętrznych. Duże, otwarte pory pozwalają przenikać wodzie, umożliwiając jej drenaż i cyrkulację powietrza dzięki temu można korzystać z poduszek w krótkim czasie po zamoczeniu. Wysycha niemal natychmiast. Posiada właściwości antygrzybiczne i antybakteryjne.

The patterns of colors, fabrics and tops are available in the catalog on pages 230-239.
